Full Stack Web Developer

I am a Full Stack Web Developer with a proven track record in developing and maintaining complex web applications. I have extensive experience in writing custom Python code to extend Django applications and possess the ability to collaborate with other developers to integrate third-party services and APIs. Additionally, I am well-versed in RESTful architectures. My goals include significantly enhancing user interaction, increasing revenue, and improving application functionality while aiming to reduce development time.

Work Experience

Full Stack Web Developer Bulut Asistan

Mar 2023 - Aug 2023

I served as a Full Stack Web Developer at Bulut Asistan company, focusing on HTML, CSS, Bootstrap, JavaScript and Django technologies and taking on key roles in various projects.

- **HTML, CSS and Bootstrap:** I built a strong foundation in visual design and user experience, developing aesthetic and user-friendly interfaces.
- **JavaScript:** In the development of browser-based applications, I designed interactive and user-friendly web pages using the dynamic features offered by JavaScript.
- **Django:** Utilizing the robust backend framework Django, I rapidly and securely developed web applications, contributing to a wide range of projects from database design to business logic.
- **Api Development:** I developed APIs and implemented integrations to facilitate data communication across different platforms.
